English C1

Experience

March 2023 - March 2024
Lionbridge (Freelance)
QA tester
QA specialist adept at implementing rigorous software testing, managing defects effectively, and optimizing processes to ensure superior quality outcomes.

2017 – 2022
Innorg S.r.l.
Developer - ABAP
Experienced ABAP Developer proficient in designing, coding, and maintaining software applications for SAP systems. Developed custom app for the main SAP modules, created complex reports, and designed integrating external systems with SAP using ABAP web services, optimizing data exchange processes.

Education

2022
University of Colorado Colorado Springs
C# Programming for Unity Game Development
In this course I learned to use Unity engine for game development using C# programming language, covering phisics, graphics, simple 2d animations, implementing audio and more.

2013 - 2017
ITIS C. Grassi
Diploma - Computer science
Technical institute diploma in computer science. During these years I have learned solid fundamentals of logic, computer systems and programming that have allowed me to become an allround developer. I learned C, C++ and Java and C# for Object oriented programming. For web development I learned html, css and javascript with PHP on the server side.
